1 Expressions

Expression 1. The following expression is taken from a source-backed formula corpus.

$$\tilde{\hat{\Omega}}_{\underline{x}}^{(0)\hat{a}\hat{b}} = -\hat{\Omega}_{\underline{x}}^{(0)\hat{a}\hat{b}}/\hat{G}_{\underline{x}\underline{x}}^{(0)}, \quad \tilde{\hat{\Omega}}_{\mu}^{(0)\hat{a}\hat{b}} = \hat{\Omega}_{\mu}^{(0)\hat{a}\hat{b}} - \hat{\Omega}_{\underline{x}}^{(0)\hat{a}\hat{b}}\hat{G}_{\underline{x}\mu}^{(0)}/\hat{G}_{\underline{x}\underline{x}}^{(0)},$$

Expression 2. The following expression is taken from a source-backed formula corpus.

$$\left[\bar{\gamma}^2 \bar{\gamma}^0 \bar{\gamma}^1 \partial_{\vartheta} + \frac{\bar{\gamma}^3 \bar{\gamma}^0 \bar{\gamma}^1}{\sin \vartheta} \partial_{\varphi} + \bar{\gamma}^2 \bar{\gamma}^0 \bar{\gamma}^1 S \partial_{\vartheta} S^{-1} + \frac{\bar{\gamma}^3 \bar{\gamma}^0 \bar{\gamma}^1}{\sin \vartheta} S \partial_{\varphi} S^{-1} \right] \tilde{\Phi} = -i\kappa \tilde{\Phi}$$

Expression 3. The following expression is taken from a source-backed formula corpus.

$$\frac{1}{\sqrt{-g'}}\partial_{\mu}(\sqrt{-g'}g'^{\mu\nu}\partial_{\nu}\phi)+\frac{1}{\chi}\left[\frac{dV_1}{d\phi}-\frac{1}{\chi}\frac{dV_2}{d\phi}+\frac{\alpha}{M_p}P(\varphi)e^{\alpha\phi/M_p}\right]=-\frac{h\gamma}{\sqrt{2}M_p}\overline{\Psi}'\Psi'\varphi\frac{e^{\gamma\phi/M_p}}{\chi^{3/2}};$$

Expression 4. The following expression is taken from a source-backed formula corpus.

$$\left|\sum_{\alpha\beta\gamma\delta}\langle\Phi_{\alpha}\Phi_{\beta}\Phi_{\gamma}\Phi_{\delta}\rangle_c/\sum_{\alpha\beta\gamma\delta}\langle\Phi_{\alpha}\Phi_{\beta}\Phi_{\gamma}\Phi_{\delta}\rangle\right|=|\langle\Phi^4(x)\rangle_c/\langle\Phi^4(x)\rangle|\,\,(n=4)\,,$$

Expression 5. The following expression is taken from a source-backed formula corpus.

$$\bar{\mathcal{G}}_{(\mathrm{I})}^{(\rho)a}\Gamma^{(\rho)}=\Delta_{\mathrm{cl}(\mathrm{I})}^{(\rho)a}+O\left(\rho^2\right)\,,\quad \bar{\mathcal{G}}_{(\mathrm{II})}^{(\rho)a}\Gamma^{(\rho)}=\Delta_{\mathrm{cl}(\mathrm{II})}^{(\rho)a}+O\left(\rho^2\right)\,,$$
