

Moderate Tables

Source-backed grouped table sample

1 Tables

These tables are grouped from source-backed LaTeX table data and compiled as a single benchmark data point.

Table 1: Source table 1: 2512.00598_table_1

Variable	Description	Detail
Patient Information		
Age	Patient age at time of admission	50.7 $\pm$ 1.3 years
Sex	Patient gender	Most frequent: Male (58.1%)
Height	Patient height in centimeters	170.4 $\pm$ 10.9 cm
Weight	Patient weight in kilograms	82.0 $\pm$ 20.8 kg
Surgery Time	Surgery start time	—
Anesthesia Time	Duration of anesthesia in hours	—
ASA Status	ASA physical status classification	Most frequent: Severe Systemic Disease (63.5%)
Discharge Disposition	Discharge location (e.g., home, rehab, ICU)	Most frequent: Home Routine (50.3%)
Patient Medications		
Medication Name	Name of the prescribed medication	Unique Medications: 1979
Medication Dose	Dosage of the prescribed medication	Range: (min, max) not provided
Medication Route	Route of administration (e.g., oral, IV)	Example: IV, Oral, Topical
Time of Administration	Time when the medication was administered	—
Patient Lines, Drains, and Airway Devices (LDA)		
Line Type	Type of line (e.g., central venous line, arterial line)	Unique Lines/Drains: 31
Drain Type	Type of drain (e.g., chest drain, Foley catheter)	Included in Lines/Drains
Airway Device	Airway device used (e.g., endotracheal tube, LMA)	Unique Airway Devices: 4
Time of Placement	Time of placement of line, drain, or device	—
Time of Removal	Time of removal of line, drain, or device	—
Location of Placement	Anatomical location of line, drain, or device	Examples: Abdomen, Antecubital
Patient Labs		
Lab Test Name	Name of the laboratory test ordered	Unique Labs: 549
Lab Result	Observed measurement or result	—
Time of Lab Result	Time when the lab result was recorded	—
Reference Range	Reference range for lab values	Abnormal flag present
Patient Postoperative Complications		
Complication Type	Type of postoperative complication	Unique Types: 10
Complication Description	Detailed description or free-text notes	—
ICU Admission	Whether admitted to ICU postoperatively	—
Mortality	Whether patient died postoperatively	—
Patient Procedure Events		
Preoperative Events	Procedures or events before surgery	—
Perioperative Events	Events during surgery	—
Postoperative Events	Procedures or events after surgery	—
