1 Expressions

Expression 1. The following expression is taken from a source-backed formula corpus.

$$\mathcal{I}_D(0, \delta_2) = \sup_{\pi \in \Pi(\mu_1, \mu_2)} \inf_{\lambda_2 \in \mathbb{R}_+} \left[\lambda_2 \delta_2 + \int_{\mathcal{V}} g_{\lambda, 2} d\pi \right] = \sup_{\pi \in \Pi(\mu_1, \mu_2)} \inf_{\lambda \in \mathbb{R}_+^2} \left[\langle \lambda, (0, \delta_2) \rangle + \int_{\mathcal{V}} g_{\lambda} d\pi \right].$$

Expression 2. The following expression is taken from a source-backed formula corpus.

$$\gamma_1 = \left\langle \sum_{X_i \in (G_1)_{X_{i'}}} \sum_{\substack{i_{\alpha_1} < j_{\alpha_1} \\ \{i_{\alpha_1}, j_{\alpha_1}\} \in J_{X_i}}} t_{i_{\alpha_1}} t_{j_{\alpha_1}} \mathbf{1}_{(w(t_{i_{\alpha_1}}) = w(t_{j_{\alpha_1}}))} \chi((i_{\alpha_1}, j_{\alpha_1}) \in i'_{\alpha_1}) \right\rangle_{w'}^{l.c.} \quad \text{and}$$

Expression 3. The following expression is taken from a source-backed formula corpus.

$$\frac{\int_S \sum_{n=1}^{\infty} \left| \sum_{\gamma \in \Gamma_{\infty}^2 \setminus \Gamma_1^2} \nabla_{\tau} \phi_{n_1}^0(\tau) \Big|_{\gamma \circ \tau} \right|^2 dV}{\int_S \sum_{n=1}^{\infty} \left| \sum_{\gamma \in \Gamma_{\infty}^2 \setminus \Gamma_1^2} \phi_{n_1}^0(\tau) \Big|_{\gamma \circ \tau} \right|^2 dV} < 10\lambda.$$

Expression 4. The following expression is taken from a source-backed formula corpus.

$$\tilde{\hat{\Omega}}_{\underline{x}}^{(0)\hat{a}\hat{b}} = -\hat{\Omega}_{\underline{x}}^{(0)\hat{a}\hat{b}}/\hat{G}_{\underline{x}\underline{x}}^{(0)}, \quad \tilde{\hat{\Omega}}_{\mu}^{(0)\hat{a}\hat{b}} = \hat{\Omega}_{\mu}^{(0)\hat{a}\hat{b}} - \hat{\Omega}_{\underline{x}}^{(0)\hat{a}\hat{b}}\hat{G}_{\underline{x}\mu}^{(0)}/\hat{G}_{\underline{x}\underline{x}}^{(0)},$$

Expression 5. The following expression is taken from a source-backed formula corpus.

$$\mathcal{I}_D(\delta) = \inf_{\lambda \in \mathbb{R}_+^2} \sup_{\pi \in \Pi(\mu_1, \mu_2)} \left[\langle \lambda, \delta \rangle + \int_{\mathcal{V}} g_{\lambda} d\pi \right] = \sup_{\pi \in \Pi(\mu_1, \mu_2)} \inf_{\lambda \in \mathbb{R}_+^2} \left[\langle \lambda, \delta \rangle + \int_{\mathcal{V}} g_{\lambda} d\pi \right].$$
