

Moderate Tables

Source-backed grouped table sample

1 Tables

These tables are grouped from source-backed LaTeX table data and compiled as a single benchmark data point.

Table 1: Source table 1: 2512.01769_table_4

ID	Composite Situations	Primitive Situations Required	Domains
CS1	A delivered object being missing from the place of delivery	An object present in a doorstep for n seconds (ST3) <i>followed by</i> the object absent for the next m seconds	SL
CS2	A car stopping in an intersection with heavy traffic flow	A car stopped changing position (ST4(a)) <i>and</i> an intersection having heavy traffic flow (ST1(a))	CM
CS3	A car taking a turn	A car going left for n seconds (ST5(a)) <i>followed by</i> a car going straight for next m seconds (ST5(a))	SL/CM
CS4	A person going towards a check-post and returns without crossing it	A person coming close to a checkpost (ST6(a)) <i>followed by</i> the same person going away from a checkpost (ST6(b))	CM
CS5	Two people crossing each other	A person coming close to another person (ST6(a)) <i>followed by</i> the same going away from another person (ST6(b))	SL
CS6	A person is being picked up by a vehicle	A person present for n seconds (ST3) <i>followed by</i> a car coming close to a person (ST6(a)) <i>followed by</i> a person not present for m seconds	CM
CS7	A person (given his/her image) entering and exiting a shopping mall/building k times	Searching for a person using his/her image (ST2(a)) <i>and</i> searching if the person entered and exited a shopping mall/building k times (ST8(a)) <i>and</i> searching if the person was holding an object (ST7(a))	SL
