

First use: **sample1** (the first sample entry), **sample2** (denoted: $\mathcal{S}_2$) and sample3.¹

Next use: **sample1**, **sample2** and **sample3**.

Value of first field (post-link hook is still used): **sample1** (the first sample entry), **sample2** (denoted: $\mathcal{S}_2$) and sample3.²

Glossary

This document is incomplete. The external file associated with the glossary ‘main’ (which should be called **sample-postlink.gls**) hasn’t been created.

Check the contents of the file **sample-postlink.glo**. If it’s empty, that means you haven’t indexed any of your entries in this glossary (using commands like **\gls** or **\glsadd**) so this list can’t be generated. If the file isn’t empty, the document build process hasn’t been completed.

If you don’t want this glossary, add **nomain** to your package option list when you load **glossaries-extra.sty**. For example:

```
\usepackage[nomain]{glossaries-extra}
```

Try one of the following:

- Add **automake** to your package option list when you load **glossaries-extra.sty**. For example:

```
\usepackage[automake]{glossaries-extra}
```

- Run the external (Lua) application:

```
makeglossaries-lite.lua "sample-postlink"
```
- Run the external (Perl) application:

```
makeglossaries "sample-postlink"
```

Then rerun **L^AT_EX** on this document.

This message will be removed once the problem has been fixed.
