

Introduction

This document is intended to check the support of `fancyvrb` or `fvextra` packages.

The only command supported is `VerbatimInput[<options>]{<filename>}`.

The variant with a star is unsupported.

Outside of the moodle question bodies, `VerbatimOut` environments can be set to define portions of code.

Fancy Verbatim

(1) LaTeX

MULTIPLE CHOICE marked out of 1.0 penalty 0.10 One answer only Shuffle

Pick up the code decorated with line numbering on both sides.

- a.

```
2 % !TEX TS-program = xelatex
3 \documentclass{article}
4 \usepackage[nostamp]{moodle}
5 \newif\iffvextra
```

2
3
4
5
→ No. Here, line numbers lie on the left side.
- b.

```
% !TEX TS-program = xelatex
\documentclass{article}
\usepackage[nostamp]{moodle}
\newif\iffvextra
```

6
7
8
9
10
→ No. Here, line numbers lie on the right side.
- c.

```
4 \ifxetex % FOR XELATEX
5 \usepackage{fontspec}
6 \else %% FOR PDFLATEX
7 \usepackage[utf8]{inputenc} % necessary
8 \usepackage[T1]{fontenc} % necessary
9 \fi
```

4
5
6
7
8
9
✓ *→ yes!*

(2) C

MULTIPLE CHOICE marked out of 1.0 penalty 0.10 One answer only Shuffle

- ```
2 #include <stdio.h>
3 int main() {
4 char c='\0', *pc=&c;
5 printf("Hello world!\n");
6 return *pc;
7 }
```
- a. `"&test"` ✓  
b. `'toast'`

c.  $\langle\langle a \rangle\rangle$
