without a sheet environment

with a sheet environment

Since our exercises are already in a dedicated subsection,

Since our exercises are already in a dedicated subsection, we do not need an extra sheet environment.

## Exercise 1

**important**

Include an exercise from an external file.

# Lexercise needs Lua<sup>A</sup>T<sub>E</sub>X!

## Overview

### ② Examples

without a sheet environment

with a sheet environment

## Missions 1

**The exercises are within a separated sheet environment.**

## Exercise 3

**important**

Include an exercise from an external file.

## Solution (Exercise 3)

I just did this.

## Solution (Exercise 3)

I just did this. And this, too.

## Missions 2

**This sheet header looks exactly like the first one, because *sheet sectioning cmd* is only used for non-beamer documents.**

Lexercise needs Lua<sup>A</sup>T<sub>E</sub>X!
