

Introduction

This document is intended to check the support of some $\text{\LaTeX}$ commands for punctuation and other symbols.

Note that $\text{\XeLaTeX}$ and $\text{\LuaLaTeX}$ will typeset " and $\text{\dqq}$ as the right double quote, while " is what $\text{\pdfLaTeX}$ typesets and is rendered by Moodle.

The typesetting of $\text{\og}$ and $\text{\fg}$ depends on $\text{\babel}$'s current language (French or other). Regardless, $\text{\moodle}$ passes the French « *guillemets* » to the XML.
