

QCD Hadron Spectroscopy with Staggered Dynamical Quarks at $\beta = 5.6$

Source-backed arXiv sample

1 Figure Captions

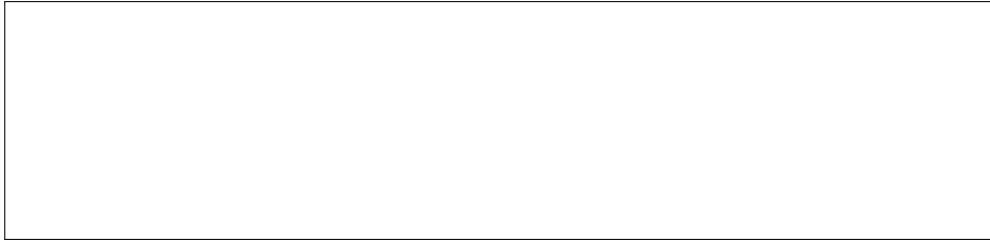

Figure 1: Pion effective masses for $m_a = 0.01$ on the old, doubled ($\diamond$) and the new undoubled lattices with ‘even-odd’ source ($\times$) and ‘corner’ source ($\circ$).

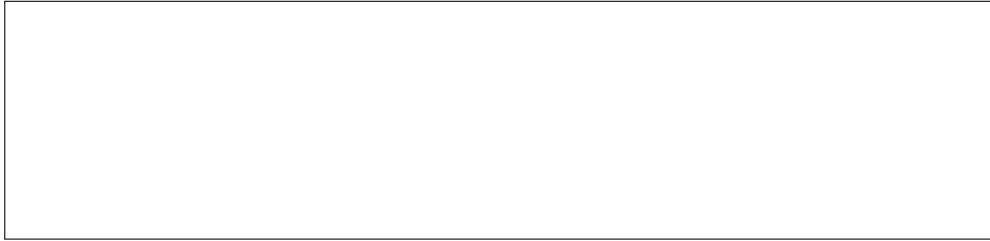

Figure 2: Comparison of Kogut-Susskind meson masses

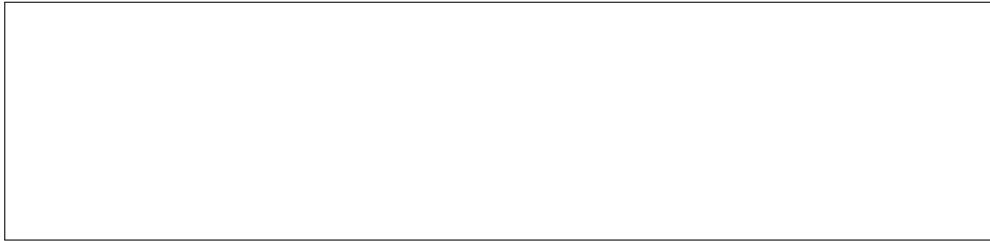

Figure 3: Nucleon effective masses with new and old source and from the old run, all with $m_a = 0.01$.

Figures 1 through 3 preserve source-backed captions while replacing external graphics with deterministic placeholders.
