

Is $S=1$ for $c=1$?

Source-backed arXiv sample

Abstract

The $c=1$ string in the Liouville field theory approach is shown to possess a nontrivial tree-level S -matrix which satisfies factorization property implied by unitarity, if all the extra massive physical states are included.

1 References And Citations

This sample cites source keys [1] and [2]. Section 1 and Equation 1 provide cross-reference coverage.

$$a^2 + b^2 = c^2 \tag{1}$$
